## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- A: Apparatus for generating heat by exothermic nuclear reactions using a metal reactor plate interfaced with two solid electrolyte layers (e.g. see Figs. 1 and 2).
- B: Apparatus for generating heat by exothermic nuclear reactions using a metal reactor plate interfaced with one solid electrolyte layer (e.g. see Fig. 4).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears generic.

2. Upon election of one of the embodiments identified above as A and B, applicant is further required under 35 U.S.C. 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears generic.

- C: Wherein the reactor plate contains at least one diffusion-impeding non-metallic layers (e.g. see claims 1 and 5).

Art Unit: 3663

- D:     Wherein the reactor plate contains a dispersion of diffusion-impending non-metallic inclusions (e.g. see claims 9 and 13).

3.     Upon election of one of the embodiments identified above as A and B, Applicant is further required under 35 U.S.C. 121 to elect a single species of the metal for the reactor plate, for purposes of examination. This additional requirement is to facilitate examining due to the diverse metals disclosed as suitable plate material (e.g., see claims 3, 7, 11 and 15).

4.     Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions

Art Unit: 3663

unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rick Palabrica whose telephone number is 571-272-6880. The examiner can normally be reached on 6:00-4:30, Mon-Thurs.
